

Working with  
hazardous substances;  
from compliance to  
responsible care

# Chemrade, responsible care

Chemrade is the state-of-the-art SaaS solution for smart management of your hazardous substances register, and for calculating and assessing the health risks for your workforce. Fully compliant with OSH and REACH regulations in a way that satisfies workers, management and authorities. That's what we mean with 'responsible care'.

State-of-the-art | High level support | Best of Breed | SaaS

## Chemrade supports companies in:

- preparing a register of hazardous substances;
- reliable substance data through managed substance databases;
- importing data from any existing data source or system;
- selecting/deriving appropriate occupational exposure limits (OELs);
- automated risk assessment by validated exposure models:  
ECETOC-TRA, Stoffenmanager exposure model;
- interpretation and documentation of external model estimates or measurement data;
- setting up a Plan of Action for risk management measures;
- creating risk-based workplace safety cards (WIK 2.0);
- compliance with OSH and REACH regulations.

## Get a grip on health risks

Through an up-to-date hazardous substances register, including the option of deriving limit values and automated risk assessments with validated calculation models (Stoffenmanager Exposure model and ECETOC-TRA Worker model).

## Clear employee communication

Clear and tailor-made Workplace Safety Cards (WSCs) designed for company specific applications. Available on PC, mobile device or Enterprise systems.

## Legislative compliance

The system supports compliance with National OSH, and with European REACH requirements (use compliance checks).

# About Chemrade Software

We aim to prevent people in daily contact with hazardous substances becoming ill through their work. We believe organizations have an important role to play here, which is why we want to help them ensure that their employees work in a safe and controlled manner with hazardous substances. Based on this conviction we offer complete and yet intuitive software that allows organizations to achieve this in their own way.

Our software has been successfully used in more than 20 countries around the world.

## Our platform is used globally in, among others, the following sectors:

- **Chemical industry -**  
producers of raw materials, refineries, tank terminals
- **Formulators (professional and consumer market) -**  
adhesives, coatings, inks, lubricants
- **End users of chemical products -**  
industrial cleaning, packaging, energy production
- **Food -**  
dairy products, confectionery
- **Agriculture -**  
crop improvement products, seed enhancement
- **Pharmaceutical industry**
- **Aviation**
